2. The following is an examiner's statement of reasons for allowance: Regarding **claim 1**, the prior art does not teach or suggest sensing the first and second targets when the fastening is occurring at the first and second locations, respectively, and generating an electronic target output based upon the sensing that differentiates between the first and second targets thereby indicating when a fastening tool is in either of the first and second fastening locations, in combination with the other claimed limitations; Regarding **claim 22**, the prior art does not teach or suggest electronically comparing the sensed position of the fastening tool with a predetermined sequence of fastening among the first and second fastening locations, and providing a sequence output indicating whether the predetermined sequence has been achieved, in combination with the other claimed limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
